

Radiator Treatment

PN X403 (8oz)

XLR8™
ACCELERATE PERFORMANCE

Product Description:

XLR8 Radiator Treatment with coolant stabilizer eliminates corrosion, scale build-up and retards the formation of solder bloom. Rebuilds and maintains pH levels in recycled coolant. Compatible with all types of antifreeze.

Advantages & Uses:

- Helps prevent rust from forming in the cooling system
- Helps condition water pump seal for extended life

Features & Benefits:

- Neutralizes acids, inhibits rust and scale, while lubricating water pump
- Stabilizes conventional and extended life automotive coolants
- Protects entire cooling system including radiator and coolant sensors
- Allows different coolant types to be mixed within one system
- Works with all antifreeze technologies
- Nitrite free
